DETAILED ACTION

1. This action is responsive to communication filed 2/16/06.

Response to Amendment

2. Examiner withdraws the objection to claim 30. Examiner withdraws the rejection to claim 16-18 under 35 U.S.C 101. However, examiner maintains double patenting rejection.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-30 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-46 of U.S. Patent No. 6,985,626 in view of Takahashi et al (6,061,283).

Patent discloses, most of the limitations of the independent claims set forth in the instant. Patent does not clearly disclose plurality of patterns including a measurement target and a standard pattern. Takahashi discloses patterns including a measurement target and standard pattern (note fig test data input and model 12 and 13). Patent

Art Unit: 2624

(Mitsui) and Takahashi are combinable because they are from evaluating semiconductors. At the time of the invention, it would have been obvious to include a target and a standard pattern in the system of the patent (Mitsui) as evidenced by Takahashi. The suggestion/motivation for doing so would have been evaluating test pattern efficiently using software (note col. 3 lines 30-50). Therefore, it would have been obvious to combine patent (Mitsui) with Takahashi to obtain the invention as specified in the above claims.

Likewise, each of limitations recited in each dependent claims 2-5, 8-12, 20-23, 25-26 and 28-30 of the instant application is also defined by dependent claims 2-18, 20-32 and 34-46 of Patent (Mitsui) in combination with Takahashi, so that these claims¹, 6, 7, 13-19, 24 and 27 of the instant applicant also fail to define a patentably distinct invention.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 2624

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
